EXPERIENCE

DXC Technologies

Mar 2023 – May 2026

Software Developer (COBOL, JCL, DB2)

Noida, India

Application: Ultra — COBOL / CICS / DB2

- Led end-to-end enhancement delivery for COBOL+CICS and COBOL+DB2 modules: requirement analysis with BAs, impact assessment, code changes, and unit testing.
- Performed root cause analysis on production incidents and implemented permanent fixes for recurring defects
- Monitored high-availability batch jobs; resolved abends, reruns, and performance bottlenecks to ensure SLA compliance

Application: Premium Audit Workstation — COBOL / DB2 / JCL

- Architected from scratch a COBOL+DB2 record-purging system to identify and delete stale records across multiple interdependent tables, improving database performance and storage efficiency
- Designed and built a conditional JCL pipeline for a modernization initiative:
- Job 1: Hourly-scheduled unload job extracts policy records to a flat file
- Conditional trigger: Job 2 executes only if records are present; otherwise, pipeline terminates gracefully — eliminating unnecessary processing cycles
- Reduced idle compute overhead by ensuring downstream processing runs on-demand

Keysight Technologies

Feb 2022 – Sep 2022

Software Engineer Intern

Kolkata, India

- Built a C++ regression testing framework for in-house network packet generation software
- The framework parses XML files containing node-level metadata for 4G/5G network packets, extracts values via OSS Nokalva APIs (mobile communication protocol parsers), and compares them against Wireshark output — auto-logging discrepancies for QA validation
- Enabled automated regression detection, reducing manual validation effort for internal releases

IIITA

Nov 2020 – Jan 2021

Data Science Intern

Prayagraj, India

- Deployed a standalone Hadoop cluster for distributed data processing
- Performed data cleaning and feature engineering on large datasets
- Built a predictive model achieving AUC score of 0.98

EDUCATION

Sikkim Manipal University

Oct 2022

B.Tech in Computer Science and Engineering

CGPA: 9.55

K.C.T.C College

May 2017

XII (PCM, BSEB)

Percentage: 73.8

G.D.S Academy

May 2015

X (CBSE)

CGPA: 9.4

Technical SKILLS

Languages: Java, C, C++, SQL, COBOL, JCL, HTML, CSS, JavaScript

Frameworks & Libraries: Spring, Spring Boot, Spring Data JPA, Hibernate

Mainframe: DB2, JCL (Job Control, Utilities, PROCs, Conditional Scheduling), VSAM

Tools & Platforms: Git, Linux/Bash, IntelliJ IDEA, VS Code, Vim, Mainframe Tools (ISPF, SDSF), AWS

TRAININGS

Mainframe Training *COBOL, JCL, DB2*

Oct 2023 – Dec 2023

- Developed COBOL-DB2 programs with data and file handling
- Worked on JCL job control, utilities, and procedures
- Implemented relational database programs using DB2
- Completed practical case studies

Java Full Stack Training *Core Java, JDBC, Hibernate*

May 2023 – Aug 2023

- Built microservice-based Hotel Management System
- Applied OOP, exception handling, and database design

CERTIFICATIONS

- [AWS Cloud Practitioner](#)
- [Oracle Certified Foundations Associate](#)
